

RENAISSANCE
GENUINE SOLID BRONZE

CLEANING AND MAINTENANCE INSTRUCTIONS

1. Regular Dusting: Use a soft, dry cloth or feather duster to gently remove dust and debris from the surface of the bronze windows and doors. This should be done regularly to prevent buildup.
 2. Gentle Cleaning: For more stubborn dirt or grime, dampen a soft cloth with mild soapy water and gently wipe the surface. Glass surfaces may be cleaned using a standard glass cleaner such as Windex. Avoid using harsh or abrasive cleaners, as they can damage the patina finish.
 3. Additional Cleaning: For marks or residue that cannot be removed with mild cleaning, a Mr. Clean Magic Eraser may be used gently on bronze surfaces. During cleaning, the patina finish may be altered. If the patina finish is altered, it may be repaired using the Patina Touch-Up Instructions.
 4. Use of Solvents: Refrain from using harsh chemicals, solvents, or abrasive materials, as they can strip away the patina and damage the underlying metal. If additional cleaning strength is required, lacquer thinner may be used sparingly and with care. Do not use paint thinner or acetone under any circumstances, as these products can degrade the silicone materials used to structurally support the unit.
 5. Patina Maintenance and Repair: If cleaning alters the appearance of the patina finish, please refer to the Patina Touch-Up Instructions for guidance on restoring the finish.
 6. Regular Inspections: Periodically inspect the bronze windows and doors for signs of damage, excessive wear, scratches, or corrosion. Address any issues promptly to prevent further deterioration.
 7. Professional Maintenance: If extensive cleaning or repairs are required, consider consulting a professional who specializes in the maintenance and restoration of bronze surfaces.
- By following these cleaning and maintenance instructions and referencing the Patina Touch-Up Instructions when needed, you can help preserve the beauty, character, and integrity of your genuine solid bronze windows and doors over time.

OPTIONAL CLEANER KIT AVAILABLE

Includes:

- Windex
- Mr. Clean Magic Eraser
- Lacquer Thinner
- Plastic razor blades
- Cleaning rags
